### 2 Order Ahead - Greenhouse & Nursery Foundation Cube
Get 10% instant savings on 16,000 pounds or more of FreeHand® 1.75G herbicide.

FreeHand® 1.75G herbicide is the professional’s choice for preemergent weed control of annual grasses, susceptible sedge species, and many small-seeded broadleaf weeds. It delivers excellent residual control, stopping the toughest summer weeds as they germinate.

### 3 Get Ahead - Earn an additional 2% Rebate Booster on your total EOP purchase when you add any qualifying quantity of Orkestra™ Intrinsic® brand fungicide, Pageant® Intrinsic® brand fungicide or Sultan™ miticide to the order. This 2% Rebate Booster applies only to nursery and greenhouse end users.
**HOW TO QUALIFY**

Purchase eligible products between **September 1, 2016** and **August 31, 2017**; Invoices must be dated within this defined purchase period.

Submit online or mail your completed rebate form and invoices to the address on the rebate form. Completed rebate forms and invoices must be submitted online and/or postmarked by **January 15, 2017** for checks to be mailed by March 31st, or submitted online and/or postmarked by **September 30, 2017** for checks to be mailed by December 31st, 2017.

**REDEMPTION**

To receive your rebate, complete the following easy steps:

2. Complete the Rebate Form on your computer by typing in the fields and it will automatically calculate your base rebate and bonus rebate.
3. Submit your claim online with electronically uploading your invoices OR print two (2) copies of the completed form; mail one (1) copy to the address below and retain the second copy for your records.

Reduce labor and application time with the DRAMM® PulsFOG

The PulsFOG® rapidly applies chemicals as a fog. The ultra-fine cloud of droplets penetrates deep into the plant canopy covering all surfaces, ensuring excellent control of greenhouse pests and diseases. The PulsFOG advantage is speed and portability. Treatment time of a 30’X 96’ can be as fast as 2 minutes. The visible fog allows the applicator to stay out of the chemical spray, increasing the safety of the application. The PulsFOG saves time and money by reducing the labor needed to spray while reducing the amount of chemical needed to control your pests. By creating billions of tiny spray droplets, the PulsFOG treats large areas with less chemical solution. Available in 4 sizes. Please contact your BFG sales rep to learn more about the Dramm PulsFOG.

Or eliminate exposure entirely with the DRAMM® Autofog

The Dramm Autofog automatically sprays areas up to 70,000sq ft with no applicator present. The ultra fine cloud of droplets penetrates deep into the plant canopy covering all surfaces, ensuring excellent control of greenhouse pests and diseases. The Autofog saves time and money by eliminating the labor needed to spray while reducing the chemical needed to control your pests. Just set the timer, mix the chemical and leave. The Autofog does the rest. Available in 3 sizes, please contact your BFG Sales rep to learn more about the Dramm Autofog.

Contact your BFG Sales Representative to learn more about these whole-house, ultra-low volume applicators.

Machine options are available for all sizes of greenhouse operations.
5% OFF CONVECTION TUBE ORDERS

The convection tube is a polyethylene tube that runs the length of the house and forces air through holes spaced along the tube. This system is best suited for houses that have a lot of obstructions. Convection tube systems can be designed for a number of different uses.

Cooling/Air Circulation
Fan and shutter kits allow outside air to be introduced into the greenhouse environment and distributed evenly throughout the house. They can also be used with the fan alone to provide air movement throughout the house instead of HAF fans.

Heating
Heat Kits allow use of gas fired, electric, steam or hot water unit heaters without outside air passing through the heat exchanger. These kits use a fan system to attach to the convection tube and allow heated air from a heat source to be forced down the length of the house though the tube.

BFG Grower Select Convection Tube
Our convection tube is available in standard stock diameters of 18in, 24in and 30in x 100ft punched. Our 4 mil UV-inhibited clear polyethylene tubing is engineered for uniform distribution and proper mixing of air to produce the best aerodynamic effect in the greenhouse. All of our convection tube is made from a UV stabilized greenhouse film.

### Custom Punching Options
Please specify the length and punching pattern and we’ll figure your hole size and hole spacing. Please allow 7-10 days for delivery on custom punched rolls.

Gambling on another year with your greenhouse poly? There’s still time to get your poly from AT Films.

Check your BFG warehouse for **IMMEDIATE AVAILABILITY!**

**Dura-Film®** Thermax™ combines outstanding thermal qualities and exceptional condensation control properties in one revolutionary, diffused greenhouse film. The modified outer layer of the film safeguards condensation control integrity by providing directionality.

**LUMINANCE®** from AT Films, Inc. has been specially engineered to give you the results you need from a highly diffused greenhouse and high tunnel film.

The Durability and Toughness You Need **Dura-Film® Super 4™** is a super clear, super tough, long-life product that provides the best value in a 6-mil, 4-year greenhouse film. Dura-Film® Super 4™ is also available with 55% white opacity in selected sizes.

**AT Films currently has the ONLY 7-layer extrusion line in the world large enough to make this type of product.**

**SmartStructure® Technology**

The 7 Layer Difference

“With the installation of their 7 Layer line, AT Films has developed the new SMART Structure Technology that will enhance the performance of their current films in the Dura-Film™ family of products, as well as open doors for the development of new products. Just by utilizing this new technology, AT Films has already seen a 30% improvement in dart impact for their widely popular Super 4®, a 4 year 6mil film. This improvement was seen without making any formulation changes. By simply structuring the film differently, we made it stronger.”

**It’s time to cover up!**

**Overwintering Poly with Immediate Availability**

Grower Select fertilizers are manufactured in North America and feature the highest quality components.

Each blend is based on the most popular formulations with excellent solubility and a complete micronutrient package.

**Grower Select® Water Soluble Fertilizers**

**20-10-20 25lb HAZ**
The backbone to a cost effective program! Low P minimizes stretch in low light growing conditions.

PLNTX11718 80/plt REG. $25.24

**17-5-17 25lb HAZ**
All-in-one fertilizer featuring five micronutrients in one bag (N,P,K,Ca,Mg). Neutral formulation has little impact on pH.

PLNTX11719 80/plt REG. $24.74

**20-20-20 25lb**
It’s a classic! This general feeding formula is effective on a wide variety of crops.

PLNTX11720 80/plt REG. $24.57

Save money without compromising on performance!
