### 6.2. ENVIRONMENTAL PRECAUTIONS

**Environmental Hazards:** This pesticide is toxic to fish and aquatic organisms. To protect the environment, do not allow pesticide to enter or run off into storm drains, drainage ditches, gutters or surface waters. Applying this product in calm weather when rain is not predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash pesticide off the treatment area. Rinsing application equipment over the treated area will help avoid run off to water bodies or drainage systems.

**Bee Hazard:** The product is toxic to bees exposed to direct treatment. Do not apply this product while bees are actively visiting the treatment area.

### 6.3. METHODS AND MATERIAL FOR CONTAINMENT AND CLEANING UP

**Methods for Containment and Clean-Up:** Caution: spillages may be slippery. For small spills, contain the spill with absorbent material and stop the flow. Prevent contamination of water sources. Collect as much material as possible. Transfer to a suitable, clean container for disposal or recovery. Seal the container and handle in an approved manner. Reclaim material if possible.

**Other Information:** Dispose of in accordance with all Federal, State and local procedures.

Shake well before and during use.

Use spray solutions within several hours of preparation for maximum effectiveness. Do not use more than 1 time per day on the same plants. Do not apply this product more than 10 times per season. For best results, maintain constant agitation in spray equipment. For optimal performance, do not mix with cold water or apply under cold ambient temperatures (less than 45°F). If product thickens (freezes) before using, place in a warm room (greater than 45°F) for a few days or in warm water (120°F) for 2 to 8 hours until completely thawed. Do not use partially thawed material. Do not apply to wilted or otherwise stressed plants, or to newly transplanted material prior to root establishment.

When using in conjunction with beneficial insects, conduct a small trial to assure compatibility before using on a large scale. As with other products that contain oils, exercise care in timing applications to early morning/late evening to minimize the potential for leaf burn. Do not add adjuvants (spreaders, stickers, extenders etc.) to Trilogy XL-O. Use with care on plants with tender tissue. Do not apply to known spray sensitive plant species such as: impatiens flowers, fuchsia flowers, hibiscus flowers, some rose flowers, ornamental olive trees, red maples, some carnation varieties, or similar plants without prior testing.

Not for use in outdoor residential misting systems.
