Mulch

Ameriscape Inc® Cypress Mulch

Natural and chemical-free. Almost impervious to decay and insect attack. Cypress mulch holds moisture and because it's shredded, it serves as an effective weed barrier. Resists rotting, molding and insects. Stays in place, resistant to floating.

2Cf

AMS77777-460 **UPC** 096821777771
Min. Buy 1EA **Retail** \$6.99

Ameriscape Inc® Pine Bark

This popular ground cover also acts as a natural soil conditioner.

Roots Organics Lush Potting Soil

Roots Organics Lush growing mix is an amended peat-based media that delivers absolute consistency and control. What makes Lush superior to the competition? Nutrient-rich, this robust mix combines a well-measured primary fertility package with ideal foundational components to maximize yield in mature flowering plants. The precise ratio of peat, coir, perlite, pumice and worm castings has been added to create ideal water holding capacity and drainage. Rich in sustaining nutrients, this media is designed for a water-only or reduced nutrient schedule. In fact, most plants can happily feed on Lush for up to eight weeks without additional support.

1.5cf

AURROL15-1135 **UPC** 799493712483
Min. Buy 1EA **Retail** \$18.49

Roots Organics Formula 707

Formula 707 is a ready-to-use soil created for a special kind of gardener, those who want to control their own destiny. Formula 707 is different from the other growing mixes created by Aurora Innovations. It was designed with greater water-holding capacity, fewer nutrients, less perlite and less pumice, and it contains ingredients specific to large container gardening. In fact, the packaging is a 30-gallon grow bag containing about 20 gallons of the finest quality potting mix. Just punch holes in the bottom, cut off the top and plant.

Soil & Amendments

Espoma® Greensand

Espoma Greensand is the highest quality, all natural, non-burning, purest Greensand obtainable. Espoma Greensand is mined from natural deposits of glauconite. These deposits are of marine origin and are composed primarily of iron-potassium silicate, which gives it its bluish green color. Potassium is an essential nutrient needed by all plant life. Other valuable properties of Espoma Greensand are its ability to loosen clay soils, bind sandy soils, and increase the water holding capacity of all soils. It is an exceptional soil conditioner for flower beds, gardens and lawns.

FoxFarm® Happy Frog® Potting Soil

Your potted plants deserve the best. Their roots can't seek out nutrition in the ground, so you have to bring it to them. That's why Happy Frog® Potting Soil is amended with soil microbes that can help improve root efficiency and encourage nutrient uptake. Between the earthworm castings, bat guano, and aged forest products, your container plants have never felt so good.

FoxFarm® Salamander Soil® Water Holding Potting Mix

The smooth shiny Salamander is a true delight of Nature. These beautiful little creatures come in a bright kaleidoscope of colors and call these forests their home. Salamanders always find the right habitat to flourish in. We have created our water holding Salamander Soil® Potting Mix so that your plants can moisturize in the same way as this special animal. Your precious little seedlings and plants will have access to the benefits of a potting mix full of NEWT-tritive properties. Under the right moisture conditions beneficial microorganisms can flourish and NEWT-trient uptake may be enhanced. Plants that are grown in hot climates need that extra thirst quench so that they can stay vigorous and not get stressed from drying out. The inconvenience of frequent waterings is sometimes problematic for growers who just can't get to their plants in time. Moisture has to be accurate; too much will cause root rot and plants will suffer. Use Salamander Soil® for rooted cuttings and young plant starts for both indoor and outdoor cultivation. Plant directly into Salamander Soil® Potting Mix. Make Your Neighbors Jealous!

FoxFarm® Bush Doctor® Coco Loco® Coconut Coir Potting Mix

As you trek through a tropical jungle, your steps remain light and buoyant, never soggy. The rainforest floor is remarkably deep with layers of exotic coconut palm humus. It is cool and damp for several inches. Hold the richness in your hands, feel the soft silky texture. It's the perfect medium for cultivating plants. Plants growing in Coco Loco® will not require water as often as your usual potting mix. Whether you're growing in hanging baskets, vertical gardens, containers, or seedling trays, extend your watering schedule. In most climates, every two to three days will be enough. Always adjust your watering schedule as needed.

GRANT COUNTY MULCH, INC.

Mulch

Grant County Mulch® Color Enhanced Mulch

When planning your next order, provide a new alternative in mulch options for your customers, such as artificially colored organic mulches. While other companies use ground up pallets, Grant County Mulch's colored mulches are produced from only safe natural wood from the forests. Generally, we use the lighter colored barks from trees such as poplar and pine. These light colored barks allow Grant County Mulch to make mulches that result in crisp, vibrant colors. The shredded texture of our Color Enhanced Mulch will not only assist with moisture retention, weed control and soil enhancement, it will also provide 9-12 months of color enrichment to any landscape.

Nutrients & Additives

JRM® Soil Moist™ Seed Coat

Soil Moist Seed Coat is a crosslinked polymer and graphite compound. It is designed to increase the germination of grass and other types of seeds. The polymer compound retains excess moisture from water and humid air. The moisture on the seed softens its tissue to promote faster germination. The graphite compound retains heat on the surface of the seed to promote germination. The graphite helps lubricate the seed and equipment to help spread the seed. 8oz of Seed Coat will treat 50lb of grass seed.

Malibu Compost Compost Tea for Fruits, Vegetables & Tomatoes

The compost tea supports the microbes in your soil by giving them the microbial food they need to "mineralize" the nutrients that are in the organic matter of your soil for uptake into your plants. This process known as mineralization is what creates and grows abundance and vitality in your garden. Compost Teas are simple and easy to use and are one hundred percent organic. It doesn't have any chemicals in it and doesn't smell at all. It is tested for GMOs and best of all, it's made from our Bu's Blend Biodynamic Compost which comes from our beautiful organic farms. It has an organic source of kelp and castings, plus additional biodynamic preparations, which enhance and strengthen your soil and plants. Compost tea is the best way for us to mimic nature when it comes to organic gardening! Your lawn will love it! Each teabag makes up to 5 gallons of tea for your plants (20 gallons per package). Enhances beneficial microbial activity on plants and in soil. Improves plant resistance to disease and pests.

Malibu Compost Compost Tea for Flowering Plants & Roses

The compost tea supports the microbes in your soil by giving them the microbial food they need to do their job to "mineralize" the nutrients that are in the organic matter of your soil for uptake into your plants. This process known as mineralization is what creates and grows abundance and vitality in your garden. Compost Teas are simple and easy to use and are one hundred percent organic. It doesn't have any chemicals in it and doesn't smell at all. It is tested for GMOs and best of all, it's made from our Bu's Blend Biodynamic Compost which comes from our beautiful organic farms. It has an organic source of kelp and castings, plus additional biodynamic preparations, which enhance and strengthen your soil and plants. Compost tea is the best way for us to mimic nature when it comes to organic gardening! Your lawn will love it! Each teabag makes up to 5 gallons of tea for your plants (20 gallons per package). Enhances beneficial microbial activity on plants and in soil. Improves plant resistance to disease and pests.

Nutrients & Additives

Wiggle Worm Soil Builder™ PURE Worm Castings Organic Fertilizer

100% organic. USE as a FERTILIZER! You only need a small amount around your plants, vegetables, shrubs or grasses to see beautiful yields and growth. A half handful around the root zone of a transplant will produce up to 3-5 times the fruit and plant growth. The nutrients and microbial activity of worm castings produce a "living soil" for your plants to thrive in. With the increased hormone and enzyme growth produced by adding castings to your soil the roots become more fibrous and healthy. A little goes a long way which makes it very cost effective! Manufactured by Unco Industries, Inc. using a proprietary growing and harvesting process that is the only way to guarantee consistently pure castings. Over 40 years of label recognition.

Soils

Nectar For The Gods Potting Soil Blend #4

A general potting mix designed for indoor and outdoor use. Suitable for multiple feedings per week. Mixed in small batches. Contains no bark or fillers. Coir fiber is rinsed on-site with Oregon rainwater and buffered with limestone to reduce salts. After blending and bagging, soil sits unwrapped and covered for up to 30 days to activate, compost and then go dormant, to avoid HOT soil. Ingredients: Sphagnum peat moss, perlite, coir fiber, pumice, mycorrhizal fungi, yucca meal, kelp meal, bone meal, diatomaceous earth, clay, basalt, oyster shell (for pH adjustment), humus and lime (for pH adjustment).

Mulch

Mulch-LOCK®

Mulch-Lock locks mulch in place, so you won't have to replace it as often, if at all. In addition, Mulch-Lock's preservers and UV inhibitors help mulch retain its natural look, extending the life and color so it will look more beautiful, longer. Your trees and plants will love it too since Mulch-Lock keeps the mulch in place, reducing the risk of mulch washing away and leaving exposed soil that can cause excessive weed growth and erosion. Keeping mulch in place can help improve the soil and increase biological activity, something your plants need to grow stronger and healthier. Mulch-Lock allows water and nutrients to flow through to the roots of the plants. It's like having a "hairspray" for mulch. After all, you probably spent a lot of money for your home's plants, trees and shrubs. Help preserve your investment in them.
