

Indoor *Growing*

Infra Red Film

AT Films® Dura-Film® Thermax

Every grower strives to produce the best crop they can while keeping production costs to a minimum. AT Films' Dura-Film Thermax greenhouse poly combines all of these extras into one package. Superior drip control, energy savings, and bee compatibility are all packaged together to provide growers with one film at one cost. Dura-Film® Thermax is available in a selection of stock sizes and is available during certain "runs or campaigns" at predetermined widths without minimums. All other widths are considered custom product.

Seed Starting & Hydroponics

Terrafibre™ Grow Mats

Using the fibrous byproduct of the industrial hemp plant, we have created Terrafibre™ grow mats. Terrafibre™ grow mats are ideal for microgreens, sprouts, wheatgrass and other short rotation crops. Industrial hemp fibres are separated, cleaned and needle punched to produce a 100% biodegradable soilless growing medium.

10in x 20in, 10pk
BCGGM102010-1233 **UPC 627843845072**
Min. Buy 12EA **Retail \$23.99**

Terrafibre™ Growing Cubes

Terrafibre growing cubes are a sustainable alternative to rockwool, peat moss, or coconut. Hemp is primarily farmed for its seed and the stalk/fibre is traditionally wasted. Through innovative processing and heat sterilization we are able to upcycle the fibres to create a truly sustainable growing media.

Other Equipment

Bluelab[®] Combo Meter

A convenient and portable solution pH, conductivity, and temperature meter all in one. Easy to read screen and push button operation, choose your preferred parameter to display. Portable with no external power supply required, this meter can be used anytime and anywhere to help manage your plant's daily nutrient requirements. Team with Bluelab[®] solutions and the convenient Bluelab[®] Carry Case. Features: · Replaceable double junction pH probe included · Shows conductivity scales CF, EC, PPM 500 & PPM 700 at the touch of a button · Lightweight and portable · Large easy to read, backlit LCD display · No calibration required for conductivity and temperature (factory calibrated) · Simple two point pH calibration process with 30 day calibration indicator · Over range and under range indicators · Low battery indicator · 2x AAA alkaline batteries included · Auto off function

Probe cable length: 2 meters / 6.5 feet

BLBMETCOM-18600 **UPC 942102492003**
 Min. Buy 1EA Retail \$308.00

Bluelab[®] Guardian Monitor

Monitoring your crops 24 hours a day, with the ability to set high and low alarms for each parameter. A flashing display lets you know if your parameters move away from the optimum, allowing you to make the important adjustments quickly and effectively. The large, clear display allows readings to be viewed from a distance. The Bluelab[®] Guardian Monitor is mains powered and is either mounted to the wall or hung on a support and probes positioned inside your reservoir / solution. Features: · Wall mount for continuous viewing · Plant-safe green LEDs, with adjustable brightness · Large easy to read displays · Replaceable double junction pH probe included · Easy to navigate menu to program & adjust settings · Selectable conductivity and temperature scales · No calibration required for conductivity and temperature · Simple push button pH calibration · Flashing high and low alarms (non-audible) · Built with greater tolerance to RF / electronic interference · International power supply · Non-volatile memory

Probe cable length: 2 meters / 6.5 feet

BLBMONGUA-24800 **UPC 942102492008**
 Min. Buy 1EA Retail \$411.00

Bluelab[®] pH Pen

The preferred option for hand held pH meters. It provides a compact, quick and handy way to manage the success of your crops to ensure maximum uptake of nutrients. A key parameter that affects nutrient uptake is whether your solution is acid or alkaline. This is measured in the pH. Teamed with the Bluelab[®] Conductivity Pen you have a robust, convenient and accurate measurement system. Features: · Measures pH and temperature · Selectable units for temperature · Fully waterproof · Backlit LCD display · Double junction probe (not replaceable) · Simple two point calibration process with 30 day calibration indicator · Hold reading function · Low battery indicator · Auto off function · Automatic temperature compensation · 1 AAA replaceable battery included

Nutrients & Additives

DYNA-GRO® Foliage Pro® Liquid Plant Food 9-3-6

Ideal N-P-K (3-1-2) ratio recommended for tropical foliage plant production and a wide range of other plants. It also supplies a high nitrate to ammoniacal nitrogen ratio needed to promote shorter internodal spacing resulting in stronger stems. This unique formulation eliminates salt build-up when used at recommended rates and is urea free so it won't burn your plants.

DYNA-GRO® Pro-TeKt® The Silicon Solution® 0-0-3

A supplement that supplies soluble silicon and potassium to build stronger plant cell walls. Plants supplied with soluble silicon become more tolerant to drought, heat, and cold stresses, bear more and larger fruit. Pro-TeKt® is taken up in the epidermis and cell walls creating a mechanically stronger plant that can support the weight of dense flowers, fruits and vegetables. Can also be used as a surfactant and to raise pH.

DYNA-GRO® Mag Pro® Nutritional Supplement 2-15-4

A unique supplement that can be used with any complete nutrition formula as a blossom booster. The high phosphorus, magnesium and sulfur content of this formula brings out color, fragrance and size in flowers, fruit and many vegetable crops. Growers using reverse osmosis, rain or deionized water benefit from the addition for Mag-Pro® to their watering schedule. Mag-Pro® is a nutrition supplement and should only be used in conjunction with a DYNA-GRO® complete nutrition formula.

Down To Earth™ Greensand

Naturally occurring in marine sedimentary deposits, Greensand is composed primarily of the blue-green siliceous mineral Glauconite. Greensand has been recommended as a soil amendment since the early 1700's due to its unique physical properties. Traditionally used to loosen heavy clay soil, Greensand is able to absorb up to one-third its weight in water to improve the moisture holding capacity of garden soils and potting mixes. Greensand is highly recommended for vegetables, fruits, herbs, lawns, ornamentals and all types of trees and shrubs. OMRI Listed.

Down To Earth™ Insect Frass 3-1-2

An all-natural fertilizer made through sustainable insect farming and derived from the larvae manure and exoskeletons of black soldier flies. The larvae are raised on pre-consumer food waste collected from local grocery stores, produce distributors and food processors. After harvesting, they are turned into a renewable source of high value protein for animals and beneficial nutrients for plants. Insect Frass is a great fertilizer for all types of plants and shares many of the same traits as other popular organic soil amendments such as bat guano and worm castings. OMRI Listed.

Down To Earth™ Langbeinite Kmag 0-0-22

A naturally mined crystalline mineral that supplies the water-soluble sulfate form of three vital plant nutrients: potassium, magnesium and sulfur. It's maximum chlorine content is less than 3.0 percent, minimizing the potential for fertilizer burn, and it's neutral pH does not alter soil activity. Potassium contributes strongly to overall plant health by regulating internal processes. Since potassium makes up part of the fluid of the plant, it is found throughout plant tissue, meaning plants need a strong source of potassium as they grow. Potassium deficiencies lead to weak stalks and immature roots, leaving the plant susceptible to insects. DTE Langbeinite 0-0-22 is widely used on sensitive vegetables and fruit crops that require high fertilization rates but do not tolerate high levels of chlorine or soluble salts. This standard grade langbeinite has a typical SGN of 95 and is an excellent source of readily available sulfur, potassium and magnesium. Contains 22% K₂O, 11% Mg and 22% S. OMRI Listed

DRAMM®

Greenhouse Ventilation

Dramm® Horizontal Air Flow System

The Dramm AME Horizontal Air Flow (HAF) Fans offer efficiency, flexibility, and simplicity. Utilizing an aerodynamic design and a high-efficiency motor, the AME fan is equipped to maximize the air flow potential of any situation. When combined with speed controllers, the AME Fans offer unmatched flexibility in air flow as plants grow and mature. Because of their shrouded, aerodynamic design and high-efficiency motor, Air Movement Efficiency (AME) fans cover greater distances with better, more even air speeds. The AME Fan design provides leverage for air movement. The result is not only increased forward propulsion but a pull from behind the fan as well.

EYE HORTILUX® BLUE Metal Halide Grow Lamp

The EYE HORTILUX Daylight Blue Metal Halide is by far the world's most powerful grow light. This grow lamp produces plants with extremely tight internodal spacing for nice compact, bushy plants. This allows the plant to produce large colorful fruits and flowers. When using the BLUE during the vegetative stage, it can shorten this period by one full week – allowing for one extra crop per year. It is the closest match to natural sunlight of any light source available today. This lamp is for experienced growers who demand the highest quality plant production during ALL phases of plant growth. Made in the USA.

BLUE MH - 1000 Watt - 4 Minute Warm Up Time - 15 Minutes Hot Re-Strike Time - Horizontal +/- 15 degrees Operating Position - E-Ballast Compatible

EYE HORTILUX® 1000W DE Ceramic HPS Lamp

Ceramic HPS is not your standard HPS light. A typical HPS light produces an orange light with a narrow spectral distribution. The Ceramic HPS produces a white light and has a much broader spectrum with an abundance of red spectral energy. It enhances essential oil production and produces plants with minimal stretching. It also produces vibrant colorful plants which stay strong and healthy throughout the flowering stage. Use the DE Ceramic HPS on its own in your flower room or in a checkerboard setup with our standard DE HPS grow lamp. Made in the USA

HDI Europonic® FossilFuel® Liquid Humic Acids

Created from the highest quality humic acids, which provide complex interactions with soils, potting mixes, and organic hydroponic media to promote healthy soils and growing media which in turn helps to produce lush plant growth and expansive root systems. Biologically, humic acids increase production of plant enzymes; act as an organic catalyst in biological processes; stimulate the production of micro-organisms; enhance natural resistance against plant disease and pests; aid in the uptake of nutrients through improved permeability of plant cells; provide building blocks for sugars, amino acids, and chlorophyll; stimulate plant growth by increasing cell division; and improve yields by decreasing plant stress.

20ml

HDIFOSPACKET-102 **UPC** 659627000896
Min. Buy 108EA **Retail** \$1.99

HDI Clonex® Mist Root Promoter

A ready-to-use foliar spray for mother plants (shortly before taking cuttings) and clones to stimulate root development. Formulated to help enhance the health and vigor of tender young plants while promoting robust root development and elongation of root hairs. Studies show that using Clonex® Mist, along with Clonex® Rooting Gel, on Ficus and Dianthus cuttings, generated roots up to 10 days earlier, with the roots being 30% longer and 156% more numerous compared to using water alone to mist plant cuttings.

HDI Europonic® Nitrozime® Marine Algae Extract

Contains over 50 naturally occurring trace minerals and macro nutrients. Long known to farmers for its rich value, seaweed has been used for centuries in coastal communities as a natural way to feed plants. At the root level Nitrozime is a seaweed extract that provides food for beneficial soil microbe activity while providing important nutrients to plants. When used as a foliar spray with Europonic Fossil Fuel, Nitrozime is quickly absorbed through leaves of plants providing immediate beneficial results. It is extremely concentrated, eight times more so than common seaweed fertilizer, and contains many of the naturally produced nutrients that all plants require for vigorous growth.

20ml

HDINITPACKET-128 **UPC** 659627000902
Min. Buy 108EA **Retail** \$2.49

HDI Ionic® Grow Plant Nutrient 3-1-5

Specifically formulated for the vegetative stage of growing plants, Ionic® Grow delivers the essential elements to the roots of a plant in a more precise manner than all previous hydroponic formulations. It is designed to maximize the potential for vigorous vegetative growth in growing plants and during the vegetative cycle of flowering plants. It is derived from 100% pure elemental mineral salts including calcium nitrate, potassium nitrate, phosphoric acid, nitric acid, potassium sulfate, and ammonium nitrate. Ionic® Grow has a highly stable pH due to the unique reactive buffering incorporated into the quality controlled manufacturing process, reducing pH fluctuations in the reservoir.

32oz

HDIONGRQT-1229 **UPC** 659627000018
Min. Buy 12EA **Retail** \$19.99

HDI MotherPlant® Nutrients Part B

MotherPlant® Nutrients are specifically formulated for the nutritional requirements of mother plants using only the highest quality lab grade minerals with added bio-organics to strengthen the plant's natural immunity to environmental stress, in turn producing the most vigorous clones possible. In short, whether you are a backyard greenhouse hobbyist or a professional commercial plant grower, MotherPlant® Nutrients will help your mother plant, or stock plant, produce the most vigorous plant clones possible!

32oz - This two-part nutrient formula provides balanced nutrition for stock plants, whether grown in soilless mixes or soil.

Min. Buy 12EA **Retail** \$17.99

Seed Starting

CowPots™

Made from 100-Percent renewable composted cow manure, CowPots give seedlings a better start. Tender, young roots easily penetrate the sides and bottoms of CowPots, allowing for unrestricted growth and healthier roots mean stronger plants. Planted CowPots breakdown fast in the ground. Composted manure naturally biodegrades quickly, so at 3 to 4 weeks, decomposition is well underway. CowPots are long-lasting before planting seedlings in the ground – staying intact for up to 12 weeks – plenty of time to give seedlings a good strong start. Best of all, the manure in CowPots is a renewable resource, unlike peat which is mined from bog eco-systems or plastic which is derived from finite fossil sources.

Growing Media

GROW!T® Organic Coco Coir Planting Mix

Use this block of organic coco coir planting mix to promote root growth for flowers, vegetables, herbs, and more. It works as both an indoor and outdoor planting mix and is ideal for hydroponics systems. Although each block of mix is equivalent to more than 2.5 cubic feet of soil when water is added, it is lightweight and easy to carry and store. Add the GROW!T mix into your growing system and notice the coco coir difference.

GROW!T® Coco Coir Mix Brick

Give your plants a sturdy growing structure with GROW!T's CoCo Coir Bricks. Now available at Hydrofarm, CoCo Coir Bricks support your plants all year long. The bricks, available in a mix or chip format, do double duty: They retain water, making sure plants never go thirsty, but due to their texture, they also offer excellent drainage properties. Plants are no longer at risk of "drowning" in too-packed or over-watered soil. Instead, GROW!T's ideal consistency gives them room to breathe and for roots to grow freely, capturing that essential air-to-water ratio for your biggest growth yet. Implement this pathogen-free media to your potting soil or in place of bark as an attractive and all-natural ground cover. Each brick expands to 0.26-0.33cu ft (2-2.5gal) of wetted coir.

Jack's® Nutrients FeED 15-5-20 Tap Water Fertilizer

Promotes growth of leaves and strong roots. Allow your plants to drink this formula designed to provide all the macro, secondary and micro nutrients on a one-part system. Specifically formulated for alkaline tap, city or well water types. This potentially acidic formula will lower pH over time without forgetting the extra soluble Ca, Mg and the right amount of micronutrients.

Water Soluble Fertilizer

JR Peters® Jacks Professional® 20-10-20 General Purpose Fertilizer

A water-soluble fertilizer designed to be mixed with water for the most accurate and effective nutrient delivery to the plant. It contains the traditional micronutrient levels needed for general production including propagation and all types of bedding plants. High nitrate nitrogen levels (60% of the total) provides for green foliage and more compact growth.

Speedgrow™ Green

Stone wool with all natural binder.

Hydroponic Substrates

Speedgrow® Green Plug

A natural alternative to growing plants in traditional mediums. Speedgrow differs from other stone wool products that may contain phenols, acrylics and artificial dyes in that it incorporates an all natural, bio-based binder. It offers a unique combination of high water absorption and good drainage for an optimal water /air ratio. Speedgrow provides the grower a clean, inert and disease free rooting medium that is easily adjusted. Ideal for hydroponic growing.

SUNBLASTER

HORTICULTURAL LIGHTING

Lighting

SunBlaster™ LED Grow Light Garden Micro

Full spectrum (6400K) grow lights replicate natural sunlight for year round growing. Features one high efficient SunBlaster 11watt LED high output light consuming 50% less power than a standard domestic light bulb and giving 50,000 hours of use. Supplied with reusable tough growing trays for easy succession planting. Includes raised platform insert and capillary matting allowing plants to self water for up to 7 days (subject to climate conditions). Canopy height adjusts easily to a maximum of 18in from the base to achieve optimal plant growth. The Grow light Garden Micro comes with everything you need to get up and growing quickly and easily. Just add seed and soil. 19.75in L x 8in w x 18in H. The included wicking system can self-water plants for up to 7 days.

White Finish / Includes: SunBlaster 12in 6400K LED Strip Light, Power-cord with on/off switch, raised platform with wicking mat (for auto watering) and 4 heavy duty reusable seedling trays

SunBlaster™ T5HO Micro Growlight Garden

Same features as the Growlight Garden but in a reduced footprint making it ideal for those with limited space. Grow what you love, love what you grow - all year long. Perfect for growing salads and herbs or for early season seed starting. Use also to boost flowering house plants out of season. Plants are never over-watered or under-watered, keeping them healthy and promoting vigorous root growth. An inner platform keeps plants above the water level, and a convenient fill hole lets you top up the reservoir as needed. NanoTech Reflectors reduce heat build up and maximize performance by reflecting 100% of the light towards the plants. Supplied with 4 reusable tough growing trays for easy succession planting. Includes raised platform insert and capillary matting allowing plants to self water for up to 7 days. T5HO Micro Grow Light Garden includes: SunBlaster 12in 6400K T5HO Combo Light, Power-cord with on/off switch, raised platform with wicking mat (for auto watering), and four heavy duty reusable seedling trays.

Black / Dimensions: 21in Wide x 5.25in Deep x 8.5in Tall. Features one high efficiency SunBlaster 11watt high output light consuming 20% less power than a standard domestic light bulb and giving 10,000 hours of use.

Controlled Release

Sustane® 4-6-4 All Purpose Fertilizer

A natural organic all purpose professional landscape fertilizer. For plant establishment, greenhouse and nursery growing and organic crop production. Adds approximately 10% humates by volume and increases the nutrient and water holding capacity of the soil. Also strengthens plants tolerance against hot dry conditions, provides greater root development, improves buffering against changes in soil pH, increases the soil's ability to suppress plant pathogens and helps increased soil porosity and stability for greater root development and water holding capacity.

Sustane® Root Zone 4-6-4 Feeder Pak Fertilizer

This permeable fertilizer pack can be left to steep in a watering can overnight to make a Compost Tea brew for topical application; or installed in the soil or potting mix as a Root Zone Feeder Pack. Sustane 4-6-4 Root Zone Feeder Packs provide single dose applications of Sustane organic slow release nitrogen fertilizer. Sustane Feeder Packs are designed to provide lasting plant nutrition in a completely biodegradable filter pack. Sustane 4-6-4 Root Zone Feeder Pack is designed for use in all flowers, trees, shrubs and perennial plantings including landscape areas, potted plants and hanging baskets.

Lighting

SunMaster® 1000W Super (HPS) High Pressure Sodium (HO) High Output Grow Light

Designed to maximize the amount of light energy (micro-moles per second) per watt (energy consumed). In addition, the spectral output of this product family has been enhanced within the core orange/red region of the spectrum to promote flowering. University and 3rd party tested, these enhanced lamps deliver the highest amount of Photosynthetic Active Radiation (PAR) per watt of any discharge light source. Sunmaster SUPER lamps are the preferred lamp choice for greenhouse operations. SUPER lamps are the most efficient light source when increasing light intensity or extending the day period to maximize photosynthesis. For indoor growing operations requiring 100% artificial lighting, Sunmaster SUPER and SUPER HO lamps drive robust flowering. Partner Sunmaster's SUPER lamps with 'COOL' or 'FULL NOVA' lamps during the vegetative period of the plant growth cycle and 'FINISH' lamps at the end of the plant growth cycle in order to maximize yield.

Color Temp: 2000K / PAR Watts: 400 / Life Hrs: 20,000

SNM50594-5056 UPC 090444505940
Min. Buy 6EA Retail \$124.95

SunMaster® 1000W Full Nova (SE) Single Ended Grow Light

Designed to replicate the balanced spectrum of sunlight. It has a very full, nutritional spectrum which contrasts heavily with the partial, or non-balanced spectrum provided by other light sources such as LED and HPS. These grow lamps deliver nutritional light, weighted in all areas of the spectrum to support critical areas of plant growth including chlorophyll A, chlorophyll B and carotenoids.

Color Temp: 6000K / PAR Watts: 360 / Life Hrs: 8,000

Nutrients & Additives

FoxFarm® Bush Doctor® Sledge Hammer®

Bush Doctor® SledgeHammer® is a unique rinse formula designed to remove excess fertilizer build up by encouraging water movement through soil and soilless media. High fertilizer use can compromise plant growth over time due to concentrated mineral salt deposits. Derived from saponin, an extract of the Yucca schidigera plant. SledgeHammer® is designed for organic gardening and can be used for both hydroponic and soil applications. OMRI listed
