Controlled Environment Agriculture

offering a complete line of systems

BFG Supply Co

Founded in 1972, BFG Supply has a long history of serving the Green Industry including professional growers, lawn and garden centers, landscapers, and indoor growing stores. As an established industry leader, BFG provides the highest levels of customer service, the broadest product range, and innovative technology solutions. BFG is a true single source supplier for all of your Green Industry needs from media, nutrients and control solutions to multi-acre fully integrated professional greenhouse structures.

BFG offers a complete line of systems for CEA/Indoor Growing and will help you design and implement an efficient system where you'll have the optimal growing environment needed for successful crops. Whether you are looking to grow in a greenhouse or 100% indoor facility, BFG's years of experience integrating systems proves valuable for new construction, rehabbing existing buildings or connecting greenhouses with buildings and processing facilities. BFG's application of the right horticulture and floriculture products combined with our industry expertise helps growers design integrated indoor growing systems that provide efficient ways to handle soil and soilless media, fertilizers, crop protection and processing in addition to plant care. BFG has ALL the products you need to launch and maintain a successful grow.

About Your Next Greenhouse Project

Scan to
watch
GHS
Videos!

Our team is committed to you! Whatever wants or needs you have we are here to help and make the process as seamless as possible. Whether it's a re-cover, improving efficiencies, or complete installation we take pride in providing the resources you need.

There Are Many Ways To Improve An Existing Greenhouse Structure

Updating Your Greenhouse Can:

Reduce Energy Costs • Reduce Maintenance Costs • Improve Productivity • Reduce Labor Costs

A better environment will produce better crops and provide quality to your team during daily operations. Investing in passive or active ventilation can provide you both. Curb appeal is also to be considered. You will be surprised how little investment will bring you outstanding returns.

BFG PARTNERS WITH FLUENCE TO EXPAND LED LIGHTING SOLUTIONS THROUGHOUT THE UNITED STATES

SPYDR Series

In 3 sizes and with 10+ rack mounting options

The SPYDR Series can illuminate all types of vertical racks and grow tables with precise and uniform light on the plant canopy. The two PPF output levels and built-in dimmability enable the exact and dynamic PPF control over each of the plant growing stages. The SPYDR Series is the indoor lighting solution for all growers looking for an edge in efficiency, quantity, and quality.

SPYDR 2 series is ideal for high PPF cultivation with single or multi-tier racking – from veg to bloom. The series has an average PPF up to 1,060 $\mu\text{mol}/\text{m}^2/\text{s}$ over a 4'x4' (122x122 cm) canopy.

VYPR Series

Built upon patented thermal management technologies

the latest VYPR top lights feature market-leading efficacies and high light output per fixture. Thus, helping reduce the fixture count and system cost per lit area to accelerate the adoption of LED horticulture lighting.

With more compact power supplies, beam widening reflectors and new mounting options, the latest VYPR empowers growers to achieve their growing targets all year round.

Now featuring six spectra, VYPR 3p offers high fixture PPF up to 2330 $\mu\text{mol}/\text{s}$ and high efficacy up to 3.8 $\mu\text{mol}/\text{s}$, enabling the direct replacement of a 1000W HPS fixture at more than 40% energy savings. The optional reflector kit provides a wider light pattern and uniform PPF at plant canopy.

Triple Threat

Each machine has various sizes and options available.

Start Clean, Stay Clean

Dramm offers a range of equipment for pest management and sanitation. The Triple Threat of Spraying, Foaming and Fogging will help keep any growing facility clean.

SPRAY with the Dramm Hydra CRF Sprayer. Fully adjustable pressure with a powerful spray. Great agitation, maneuverability, and ease-of-use. Drench or spray. The CRF is built for use with corrosive products.

FOAM with the Dramm FM20-25. Air-driven foamer that connects to your compressor to produce a thick, rich foam that persists. Disinfectants rely on contact time. Foam increases contact time.

FOG with the Dramm Autofog-SS. Automatically apply bio-pesticides, oxidizers and standard pesticides with an ultra-fine fog. Coat all surfaces ensuring even, effective coverage. The SS version is built for Corrosive duty.

The world's purest water-soluble fertilizer

Peters[®]

Only the highest-quality ingredients are used to make Peters water-soluble fertilizer. Clean, clear formulations result in total solubility, reducing labor and product costs by eliminating precipitate build-up, clogged emitters, and repeated applications. Our exclusive M-77 chelating formula provides the vital nutrients, trace elements and efficient uptake needed for outstanding quality and brilliant color. Contact your BFG rep today to learn more about Peters—the clear choice in water-soluble fertilizer.

TRUST THE INNOVATORS OF THE HIGHEST
QUALITY WATER SOLUBLE FERTILIZERS

JR PETERS INC

JR Peters Inc. makes the highest quality & truly soluble nutrient blends on the market. How can we say that? Because we are here watching over every step of the process. From research & formulation design in our small batch lab, through the intense qualifying of the purest raw materials, to our long-time employees watching over each handcrafted batch. The family at JR Peters ensures that the nutrients in our blends meet the strictest standards that will grow top quality plant material.

Soluble. Available. Consistent.

Horticulture films that help your business grow

SUPER4™ Greenhouse Film

The Durability and Toughness You Need

Super 4™ is a super clear, super tough, longlife product that provides the best value in a 6-mil, 4-year greenhouse film. Super 4™ is also available with 55% white opacity in selected sizes.

- Outstanding light transmission, haze, and clarity ratings help optimize yield in greenhouse applications.
- A unique manufacturing process and advanced resin technology provide superior tear strength.
- Advanced UV stabilizers maximize physical properties and help protect film from chemical damage.
- Bee compatibility feature allows more of the UV spectrum to pass through, making it easier for bees to navigate and achieve more efficient pollination.

THERMAX™ Anti-condensate Film

Durability, Energy Savings, Plus Condensation Control

Thermax™ combines outstanding thermal qualities and exceptional condensation control properties in one revolutionary, diffused greenhouse film.

- Outstanding thermal properties keep the heat in by reducing radiant heat loss. Heaters consume less energy to maintain a set temperature leading to potential energy savings of 15–20%.
- Directional condensation control ensures the additive migrates to the surface facing the crop. This feature controls drips, maintains light transmission and enhances thermal benefit.
- Diffused light reaches plants from many angles while par light transmission remains the same, optimizing light distribution in the greenhouse.

LUMINANCE™ Tunnel Film

The Results You Want

LUMINANCE™ has been specially engineered to give you the results you need from a highly diffused greenhouse and high tunnel film.

- Lowers greenhouse temperature by as much as 9°F when compared to standard film.
- Produces higher-yielding plants with stronger than normal root systems.
- Less demand for watering.
- Inhibits fungus spore development for healthier plants.
- Inhibits insect propagation.
- Prolongs the growing season.
- Allows for an earlier harvest—up to three weeks earlier harvests have been recorded.

Pradia®
Insecticide

NEW

Pradia is a registered trademark of Ishihara Sangyo Kaisha, Ltd.

Pradia® is a combination product developed to control a wide variety of sucking and chewing pests on ornamental and nursery crops. Pradia delivers a quick knockdown and excellent long-term control on aphids, thrips, whitefly and scale.

PROMIX[®]

**BIOFUNGICIDE[™]
MYCORRHIZAE[™]**

THE VALUE-ADDED COMBINATION

ENHANCE

The use of fertilizer and water. Increase resistance to stresses. Improve plant strength and productivity. Optimize plant growth rate and uniformity.

PROTECT

By reducing incidence of plant root diseases (*Fusarium*, *Pythium* and *Rhizoctonia*) and risk of pathogens that develop resistance to chemical fungicides.

SUPPRESS

Certain insects, including fungus gnats and thrips that pupate into the growing media, by suppressing their food sources and plant susceptibility.

More Information

Carrying These Brands Means:

OWNERSHIP • CONTROL • PROTECTION • PROFIT

VPG's net operating income is paid back to qualified patron-owners each year.
This has resulted in a total of over \$300,000,000 in Patronage Refunds to date.

ARE YOU AN OWNER?

Protect the value of lawns, landscapes, trees, nursery or greenhouse grown
ornamental and edible plants from target white grubs, beetles, weevils and borers.

grub GONE!® G

Granular Formulation: Apply grubGONE! with a spreader to
control turf grubs feeding in the root zone of turf & ornamentals.

beetle GONE!® tlc

Water Dispersible Powder: Mix beetleGONE! with water to use as a
ground spray to control turf grubs or apply to foliage to control adult beetles.

Based on patented, *Bacillus thuringiensis galleriae* (BTG), bio insect control. Apply even when bees and beneficials are active.

Lawn & Garden Retail Programs

Shipments after 11/1/21 = Net 5/25/22

2021 Expo Terms

Some exclusions apply – please refer to actual show program for details.

Anticipation Discount

In addition to the show pricing BFG will be offering the following anticipation discounts;

Pay on or before 2/28/22 - Receive an extra 1% discount

Pay on or before 3/31/22 - Receive an extra 0.5% discount

These discounts may be deducted from your early payments. Please mark your remittance with “anticipation discount” and the amount. Each vendor program has its own terms. Payment terms are stated on the top of each page and will be included on your invoice. Any discount, including anticipation discounts, will only be honored on invoices paid and received into the BFG office within the terms specifications. Buyer is responsible for mail time.

SPIFF Deal

These special incentives are determined by the vendors and vary based on the vendor program. Incentives are only available by visiting the vendor's booth at the expo. Vendors must apply the SPIFF to your order at the show. All applied SPIFFs are available to view on your Show Order Recap available as a print out from the kiosks at the BFG expo.

SPIFFS MUST BE WRITTEN IN PERSON DURING THE BFG EXPOS:

- Denver, CO Expo - September 1-2, 2021
- Cleveland, OH Expo - September 22-23, 2021

No Exceptions!

All SPIFFs will be entered as a credit on your BFG account by April 28, 2022.*

Imported Products

Unlike domestic goods, overseas production requires ever expanding lead times. What used to take 90 days to get product into the states can now take 6 months or more. In a seasonal business like ours, this makes timely preparation critical.

You should also be aware that due to lead times, refill opportunities may not exist. Plan accordingly and commit to orders that will last throughout your selling season. Please feel free to contact your BFG Supply sales representative with questions.

Price Volatility

In the last 18 months, we've witnessed global supply chain disruptions never seen before. The pandemic has shaken suppliers in all industries with material shortages, production delays, transportation inefficiencies, and labor shortfalls. In addition, a range of raw materials including steel, resin, wood, and many others have undergone dramatic price hikes. Together with the explosive cost of container freight and a rise in domestic ground transportation, these factors create tremendous price volatility. BFG works closely with our suppliers to understand price changes and mitigate their impact. Our intention is always to maintain the pricing in our published show programs. However, in the current environment we cannot guarantee prices throughout the show period. If a price change occurs on an active program, our customers will be advised of the change and given a chance to cancel or revise their orders. We thank you for your business and your understanding in this challenging time.
